

Project Proposal

Team Members

Name	Student Number
Jiasong Liang	1004203337
Cheng Gao	1004231057

Goal

We will write our own http server as the option 9 in the handout. It should:

- support http 1.0 + 1.1 and pipelining;
- serve multiple types of files from the host machine, including .html, .css, .js, .txt, and .jpg;
- support http 2 over TCP if time allows.

We will implement our project using golang.
